

**Services**

Offering clients comprehensive solutions – not just introductions or bits of advice.

## SERVICES

**Fundraising & Private Placements**[Print Page](#)

Islemount draws upon our local and international relationships with institutional, corporate and family investors to marshal private equity for our clients and create tangible competitive advantage. Our specialized and tailored advisory services provide the close attention required to assist clients in successfully navigating such a crucial growth activity as raising outside institutional funding.

We manage the entire fund raising process from documentation to negotiations and the selection of the right investment partner. Our experience enables us to successfully attain multiple goals: capital raising to achieve financial requirements while planning mutually satisfying, long term exits. We understand that for any organization capital raising can be stressful and disruptive. Islemount brings creativity, certainty and clarity to the entire process by working closely with managers.

Investors also utilize our extensive network to divest or raise additional capital for their portfolio of investees. In their breadth, variety and global presence, our clients constitute an impressive array of sizes and industries. They include smaller firms with rapid growth plans, publicly traded companies and the largest and most prestigious institutions. All of them understand the importance of decisive fund raising capability.

Islemount primarily raises expansion or growth capital for more established enterprises. Our typical fund raising range is US10 to over US125 million. However, we are interested in select, early stage venture capital situations where there are particularly unique long term synergies between us and the company that can drive future growth. In such situations we establish an equity relationship and longer term advisory role.
